Press and hold STOP/RESET pad for 3 seconds to deactivate. 6 16 • Oven beeps and key graphic 7 17 8 18 This function mutes the keypad beep sound (except for end of cycle beep) by: 9 19 1. Press and hold QTY 2X pad for 3 seconds. • DOUBLE displays, oven beeps and MUTE displays for 1 second, then :0 appears in display. 20 2. To deactivate, press and hold QTY 2X pad for 3 seconds. POWER • DOUBLE displays, oven beeps and :0 appears in display. LEVEL +30 SEC DEFROST When DEFROST is selected, the automatic cycle divides the defrosting time into periods of alternating defrost and stand times by cycling on and off. Maximum defrost time is 60 minutes. Check Program Pad This feature allows you to check the programmed cooking time and power level of any programmed pad. Defrost Pad 7 appear in display. disappears from display. Ensure the vent or exhaust fan is turned on and the right speed is selected. The directions for turning the vent on/off and changing varies by the model number. To Turn the vent fan on/off: Touch Vent Fan pad once for high, twice for medium, three times for low or four times for off. The directions for turning the Refer to the Owner's Manual for specific information about the vent fan, not all models have three speeds. If you would like to download or view product literature for your appliance, please visit our Manuals and Literature page. To protect the microwave oven, if the temperature from the range or cooktop below the microwave oven gets too hot, the vent fan will automatically turn on at low speed. It may stay on for up to 1 hour to cool the microwave oven. When this occurs, the vent fan cannot be turned off. If the vent fan pad is touched during automatic fan operation, "Auto Fan is on, fan speed will remain on until heat is no longer sensed" will scroll in the display as a reminder. The vent fan is also the cooling fan and will start at low speed when any non-sensor cooking function begins or at medium speed when any sensor cooking function begins. It will remain on until the cooking function ends. Refer to the Owner's Manual for specific information about the vent fan, not all models have three speeds. Touch Vent Fan pad once for high, twice for medium, three times for low or four times for off. Power unit down by turning off the circuit breaker(s) for one (1) minute. Power unit up by turning on the circuit breaker(s) or replacing the fuse. Verify microwave operation. Monitor the microwave for one (1) minute to ensure proper operation. NOTE: Do not continue to attempt to operate the microwave if the circuit breaker or fuse opens again. Disconnect power cord, turn off circuit breaker, or remove the fuse that controls the appliance. Was this article helpful? The microwave oven's cooling fan (on some models), which is separate from the vent fan, automatically comes on during microwave oven operation to cool the microwave oven. It may also automatically come on and cycle on and off to cool the microwave oven's controls while the cooktop below is being used. It may stay on for up to 1 hour to cool the microwave oven. When this occurs, the vent fan cannot be turned off. Was this article helpful?
